

ConcenTrace® , a unique, full spectrum, ionic, liquid, trace element supplement.

Reduced sodium ConcenTrace® Trace Mineral Drops is the most concentrated liquid trace mineral supplement in the world. It is impossible to underestimate the importance of minerals and trace minerals for the human body. They are the catalysts for all the vitamins and other nutrients your body uses for developing and maintaining good health. ConcenTrace® captures the perfect balance of these minerals.

ConcenTrace® may be used every day (mixed with juice, food or to remineralize purified water)

to help support your body's entire electrical system.

Why is ConcenTrace® so powerful? Coming from Utah's Great Salt Lake, ConcenTrace® contains the full spectrum of all the naturally occurring minerals and trace elements present in the Periodic Table, in a balance and form appropriate to the body. A completely natural process is used that removes 99.5% of the sodium and results in a finished product that is about 26 times more concentrated than any other liquid trace mineral on the market

that we have come across or tested so far.

ConcenTrace® Trace Mineral Drops. No other health supplement has the natural form, balance, and concentration. Our pledge is your money back if you are not entirely satisfied with this product.

Reduced Sodium
ConcenTrace® Trace Mineral Drops

The Most Powerful, Natural, Health Giving
Trace Minerals in the World

*Formulated by nature for greater bio "electric" health
and body mineral balancing*

From Utah's Inland Sea the Great Salt Lake – Soluble – Liquid – Ionic

This naturally derived, liquid trace element, food supplement contains – besides those minerals listed below – a full spectrum of trace and ultra-trace elements in ionic form. These minerals have been derived from the weathering and erosion of the huge variety of soils and rocks found in the 90,000 sq km drainage basin of the Great Salt Lake of Utah – USA.

ConcenTrace® is appropriate to take with normal or sodium restricted diets. It is so concentrated that 1.85 ml (30 drops) is equivalent to over 100 ml of sea-water with 99.5% of the sodium removed.

As a daily supplement take one drop per 2.7 kilo (6 lbs) of body weight per day. ConcenTrace® is best taken on two separate occasions i.e. with your breakfast and evening meals. Mix into either in a glass of water, fruit juice or herbal tea, to taste, preferably before meals. At 30 drops per day a 114 ml bottle will last 62 days. Increased intakes are safe if needed or desired but larger amounts may have a laxative effect.

To improve the flavour of Reverse Osmosis, De-ionised, or Distilled Water, add 5 to 10 drops per litre, or to taste, to get the flavour of expensive mineral water whilst adding a broad spectrum of reduced sodium minerals and trace minerals. At 5 drops per litre a 114ml bottle will re-mineralise 370 litres.

Ingredients: Concentrated Solution of Ionised Minerals

1.85 ml (30 drops) supplies the following:

Minerals

| | |
|-----------------|-------------------|
| Magnesium | .188 mg |
| Chloride | .525 mg |
| Sulphate | .60 mg |
| Potassium | .less than 7.5 mg |
| Sodium | .less than 7.5 mg |
